PROFESSIONAL SUMMARY

Software Developer with 5+ years of web-development experience, including 4+ years building production Angular and AngularJS applications. Strong in Angular 14-20, AngularJS 1.8, TypeScript, JavaScript, RxJS, Python, REST APIs, Cypress, Git, Linux, and secure web-application workflows. Experienced in security-sensitive SaaS and open-source platforms, including GlobaLeaks, with contributions across responsive UI, backend integrations, database migrations, permissions, audit logging, testing, and system optimization. Holds a BS in Electrical Engineering and brings an engineering approach to troubleshooting, automation, documentation, and cross-functional delivery.

CORE SKILLS

Frontend	Angular 14-20, AngularJS 1.8, TypeScript, JavaScript ES6+, RxJS, HTML5, CSS3, SCSS, Tailwind CSS, Bootstrap, Angular Material, responsive design
Backend & APIs	Python, Twisted, FastAPI, SQLAlchemy, Pydantic, PHP, Laravel, Node.js, Express.js, RESTful APIs, JSON, OOP
Databases	MySQL, SQLite, PostgreSQL, SQL Server, MongoDB, database migrations and performance optimization
Testing & Quality	Cypress end-to-end testing, API testing, debugging, troubleshooting, code reviews and regression testing
Security & Identity	Keycloak, OAuth2/OIDC, JWT/Bearer token flows, role-based permissions, secure file handling, audit logs and hash verification
Tools & Platforms	Git, GitHub, Angular CLI, npm, Ubuntu/Debian Linux, Docker fundamentals, CI/CD fundamentals, Trello and Agile collaboration
Modern Angular	NgRx, Signals, Standalone Components, reusable architecture, forms, routing, interceptors and component libraries

PROFESSIONAL EXPERIENCE

Software Developer | Genesis Technologies

Lahore / Faisalabad, Pakistan | May 2023 - Present

- Develop and maintain production web applications using Angular, AngularJS, TypeScript, Python, REST APIs, Git, Linux, and Cypress across SaaS and secure whistleblowing projects.
- Contribute extensively to GlobaLeaks, an open-source secure and anonymous whistleblowing platform, improving recipient/admin workflows, configuration management, report handling, and system usability.
- Build and enhance modules for audit logs, configurable statistics dashboards, backups, secondary SMTP, support workflows, forwarding requests, antivirus status, responsive mobile tables/cards, and session management.
- Develop Python/Twisted backend components, database models, migrations, permissions, notifications, cryptographic workflows, and API integrations; optimize migrations and data handling for reliability.
- Implement security-focused features including Keycloak/OIDC authentication, token interceptors, role/profile-based access control, secure file processing, audit trails, and SHA-256/SHA-512 verification.
- Create and maintain more than 100 Cypress test cases across complex end-to-end workflows, improving release confidence and regression coverage.
- Review other developers' code, mentor junior developers, investigate Linux/runtime issues, and collaborate with teams of approximately 20-30 developers and stakeholders.
- Contribute to large applications and multi-module systems while maintaining clean code, reusable components, consistent naming, and detailed technical documentation.

Angular Frontend Developer | The University of Faisalabad

Faisalabad, Pakistan | Jul 2022 - Apr 2023

- Led frontend development for a comprehensive School Management System using Angular 14, TypeScript, RxJS, Tailwind CSS, Angular Material, and REST APIs connected to a Java backend.
- Built and maintained modules for LMS, HR, student admissions, inventory, gate management, financial accounts, and related administrative workflows.
- Created reusable CRUD interfaces, complex forms, routing flows, reusable components, validations, and dashboard screens for university operations.
- Resolved UI defects, improved responsiveness and usability, integrated APIs, and collaborated with backend and product teams to deliver stable production features.

Internee Web Developer | Softrix Technology

Faisalabad, Pakistan | Jun 2022 - Jul 2022

- Developed and maintained trackmypackage.net using core PHP, Bootstrap, JavaScript, and MySQL.
- Participated in code reviews, debugging, troubleshooting, and enhancement of database-driven web functionality.

Web Development Intern | Wapexp College

Faisalabad, Pakistan | Apr 2022 - May 2022

- Gained hands-on experience in HTML, CSS, Bootstrap, jQuery, JavaScript, PHP, and WordPress development.
- Supported debugging, UI improvements, and troubleshooting of web applications.

Electrical Engineering Intern | Sapphire Textile Mills Ltd.

Faisalabad, Pakistan | Oct 2020 - May 2021

- Completed an eight-month industrial internship in the Power House, Weaving, and Processing units.
- Gained practical exposure to Jenbacher gas generators, diesel generators, PLCs, VFDs, inverters, electronic circuits, industrial automation, and electrical maintenance.
- Worked with assistant engineers and audit personnel during inspections, preventive-maintenance activities, documentation, and operational reviews.
- Developed strong industrial troubleshooting, safety awareness, technical observation, and cross-functional teamwork skills.

SELECTED PROJECTS

GlobaLeaks - Secure Whistleblowing Platform | Open-Source Project

AngularJS, Angular, TypeScript, Python, Twisted, SQLite, Cypress, Linux

- Enhanced recipient/admin interfaces, report management, audit logging, forwarding workflows, support functionality, antivirus-related flows, backup settings, and secure file/comment handling.
- Improved maintainability through database migrations, REST API integration, responsive/mobile design, role-based permissions, automated tests, and production troubleshooting.
- Project: github.com/globaleaks

School Management System | The University of Faisalabad

Angular 14, TypeScript, RxJS, Tailwind CSS, Angular Material, REST APIs

- Developed modules for LMS, HR, admissions, inventory, gate management, financial accounts, and dashboards.
- Implemented CRUD interfaces, validations, API integrations, responsive fixes, and reusable components for internal university operations.

Track My Package | Softrix Technology

PHP, MySQL, Bootstrap, JavaScript

- Built package-tracking functionality and supported database-driven pages using PHP and MySQL.
- Project: trackmypackage.net

EDUCATION

MS Computer Science (MSCS) | The University of Faisalabad

Faisalabad, Pakistan | September 15, 2026 - Present

BS Electrical Engineering (Electronics) | The University of Faisalabad

Faisalabad, Pakistan | 2015 - 2019

Web Development Course | Wapexp College

Faisalabad, Pakistan | 2021 - 2022

CERTIFICATIONS

HTML Fundamentals Course - Sololearn (Jan 2017) | PHP Course - Sololearn (Jul 2022)

LANGUAGES & ADDITIONAL STRENGTHS

Languages	English - Professional Working | Urdu - Native
Strengths	Problem solving, self-motivation, initiative, mentoring, code review, team leadership, relationship building and cross-functional collaboration
